| * Approximate quantity depending on your desired length <br> ** Quantities for Bracelet |  |  |  |  |  |  | Crimping Tools Angle Edge Cutters |

Begin the necklace by cutting 8 strands of 24 " lengths of wire (or longer if creating a longer piece: see tip number three). Feed crimp bead onto all eight strands, feed the strands through toggle or clasp, then back through crimp bead. Using crimping tool, crimp bead tightly to secure all eight strands, and cut excess wire with angle edge cutters. Begin stringing crystals using the pattern below:

## STEP 1

Strands $1 \& 2$ : 4 mm bicone aquamarine
Strands $4 \& 5: 5 \mathrm{~mm}$ round aquamarine
Strands 7\&8: 6 mm bicone turquoise

## STEP 2

Strands $2 \& 3$ : 4 mm bicone indicolite
Strands 6\&7: 5 mm round aquamarine

Continue to repeat steps 2 through 5 until you have accomplished desired length. Add additional crimp bead, and other end of toggle or clasp, and finish off as mentioned above.

The bracelet will be created using the same instructions for the necklace, but begin by cutting eight 12 " strands.

Tips:

- While working in the crystals, count strands of wire $1-8$, working from the left to right.
- You may want to tape piece down to a table or solid surface to help stabilize while working in the crystals.
- Keep in mind that the toggle and crimps will add $1 \not 1 / 2^{\prime \prime}$ to $2^{\prime \prime}$ of length to the finished piece, when cutting initial wire lengths.

## STEP 3

Strands 1\&4: 5 mm round aquamarine
Strands 5\&8: 6 mm bicone turquoise
STEP 4
Strands 2\&7: Indicolite

## STEP 5

Strands $1 \& 3: 5 \mathrm{~mm}$ round aquamarine
Strands 6\&8: 4 mm bicone aquamarine
